

SCHOOL MINE SITE TOURS

Learn about the many and varied careers available in mining and have student's questions answered by local people working in the industry.

A school mine site tour is an ideal opportunity for secondary school students considering career pathways to:

- Tour an operational mine site
- Meet engineers, environmental scientists, geologists and trades professionals to learn about the science behind mining
- Understand the future skills required to work in the mining industry

Explore career options

Students will also gain insights into the science and future needs of mining.

Environment: Hear from environmental scientists on environmental, rehabilitation and heritage management across a mine's life

Technology: Learn about the digital transformation underway in the mining industry, from AI to mechatronics

Mine engineering & geology: Learn about the process of mine planning, construction and processing from engineers, geologists and metallurgists.

Trades: Learn about the roles to run a mine site from diesel mechanics to truck drivers and electricians.

“

It was an eye opener for our students as many do not realise the range of careers the gold mine offers, literally at our back door!

TEACHER

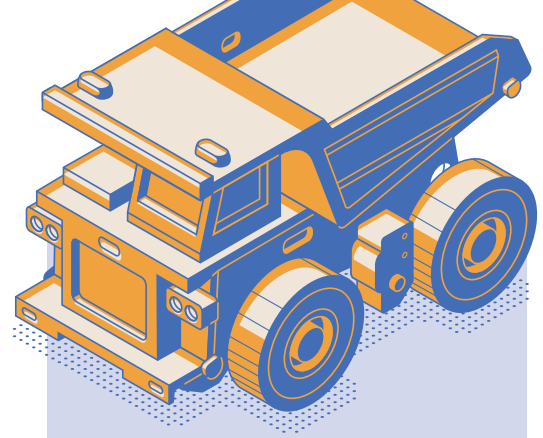

”

“

I never knew a job like this existed! [During a discussion with a metallurgist]

STUDENT

”

WHO

Year 10-12 students considering career and subject pathways. Tours can be tailored to specific cohorts whether tertiary or trade.

DURATION

Half-day program + travel time

LOCATION

Closest gold mine (mines are located near Bendigo, in Stawell and Ballarat)

TRANSPORT

Provided if needed

COST

Free of charge to schools
